

Skeletal traction, simplified.

IMPROVE PATIENT CARE

Alleviate patients' pain faster while maintaining sterility.

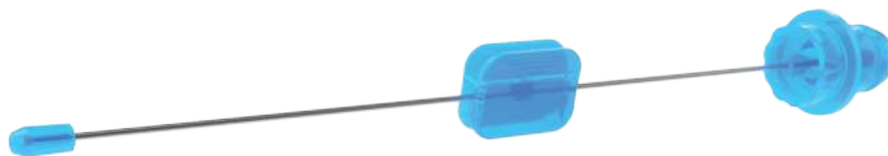

FIGHT RISING COSTS

Reduce costs by eliminating reprocessing and the use of expensive OR power. Increase ED revenue by treating patients faster and discharging them faster.

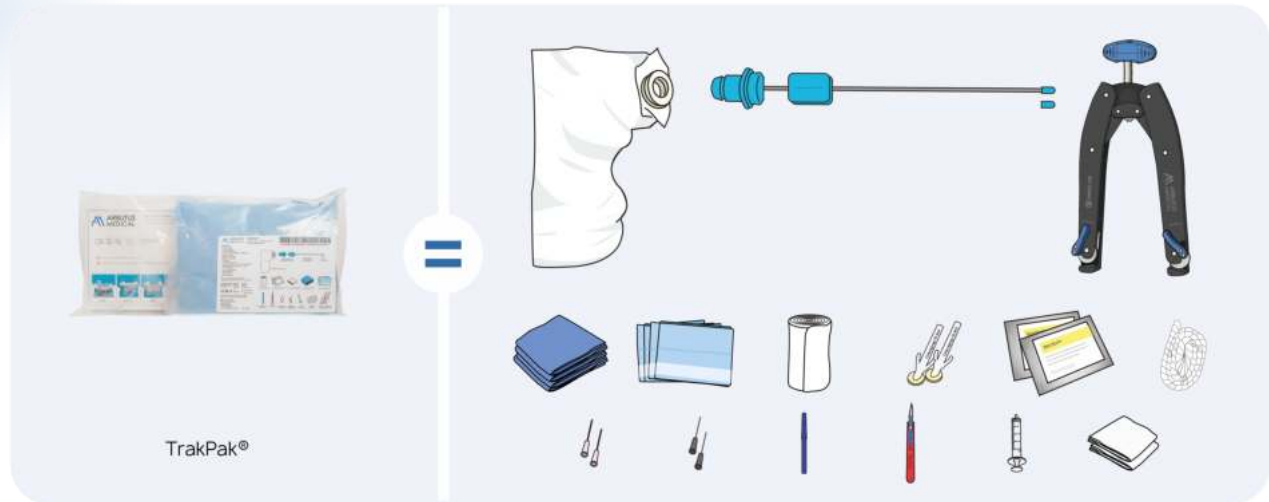

CREATE CLINICAL EFFICIENCIES

Standardize skeletal traction by eliminating the need to borrow power, Kirschner Bows, and other items from throughout the hospital and removing the need for central sterile processing.

The TrakPak system
